Fundamentals:
Gold prices slipped to their lowest in about two months on Thursday, after a drop in U.S. weekly jobless claims numbers favoured the Federal Reserve's stance that interest rates would have to go higher to control inflation.

Spot gold was down 0.1% at \$1,823.16 per ounce by 2:16 p.m. ET (1916 GMT), having touched their lowest level since Dec. 30 earlier. U.S. gold futures fell 0.8% to settle at \$1,826.80.

The number of Americans filling new claims for unemployment benefits unexpectedly fell last week, pointing to a tight labour market and inflationary pressures.

Meanwhile, the country's gross domestic product increased at a revised 2.7% annualised rate in 2022's fourth-quarter, revised down from 2.9% reported last month.

While GDP numbers missed expectations by a bit, the lowered drop in jobless claims keeps the Fed in the driver's seat such that they can keep raising rates, said Bob Haberkorn, senior market strategist at RJO Futures.

Minutes from the Fed's Jan. 31-Feb. 1 meeting on Wednesday showed policymakers agreed rates would need to move higher, but that the shift to smaller hikes would let them calibrate more closely with incoming data.

Fed fund futures now price in three more hikes to 5.25-5.50% scaling back expectations for future rate cuts.

High interest rates dampen gold's appeal as an inflation hedge while raising the opportunity cost of holding the non-yielding asset.

The dollar index rose to a seven-week peak, making gold more expensive for other currency holders.

Spot silver fell 0.9% to \$21.31 per ounce, platinum slipped 0.2% to \$947.33, and palladium dropped 2.9% to \$1,439.82.

UBS expects auto-catalyst palladium's prices to fall to \$1,400 per ounce by end -December on a combination of slower economic growth and on substitution with platinum.

Copper fell the most in two months as hawkish signals from US Federal Reserve outweighed supply risks emanating from the shutdown of a major Panamanian mine.

The red metal slumped 2.3% in London trading on Thursday. A drop in US unemployment claims bolstered expectations that the Fed will pursue more rate hikes in a bid to cool off labor markets. Meanwhile, First Quantum Minerals Ltd.'s Cobre Panama mine, which accounts for about 1.5% of global production, shut amid a tax dispute.

Thursday's decline trimmed copper's year-to-date advance to 6.4%. The contract has found support from optimism about the prospects for a demand rebound once Asia's top economy fully recovers from strict pandemic lockdowns, and on supply disruptions in Asia and Latin America.

Copper settled at \$8,904 a metric ton for the biggest one-day loss since Dec. 15. All major base metals declined, with aluminum down 0.9%.
