

INTRODUCING

SGX SICOM Rubber Futures (TF)

WHAT IS THIS?

SGX offers two SICOM Rubber Futures contracts – RSS 3 and TSR 20 to provide market participants with a reliable pricing basis as a point of reference for their physical cargo and to manage price risks. SGX remains committed to serve as a pricing benchmark for regional and global producers, traders and consumers.

FUN FACTS:

- Natural rubber is a processed material obtained from the latex of Hevea Brasiliensis trees and may be used to manufacture different grades of rubber.
- Technically Specified Rubber (TSR) is liquid latex which has been allowed to congeal naturally and reformed into blocks that can be used in tyre manufacturing.
- Ribbed Smoked Sheet (RSS) is liquid latex rolled into sheets and put through a smoking process.

INTRODUCING

SGX MSCI Singapore Index Futures (SGP)

SGX SGP FUTURES
(SGP)

WHAT IS THIS?

SGX MSCI Singapore Index Futures (SGP) allow investors to quickly take advantage of both event-driven news and long term economic trends of the broad stock market in a fast and cost-efficient way with a single transaction.

FUN FACTS:

- Trading the MSCI Index Futures contract requires an initial margin deposit that represents only a small fraction of the value of the contract, thus freeing up more capital compared to stocks or ETFs.
- Offers flexibility to employ a variety of trading strategies (portfolio hedging, directional positioning, index arbitrage).
- No restrictions for short selling the MSCI Index futures contract to take advantage of declining market.
